

## Fund objective

The fund is a passively managed solution that aims to replicate the performance of a composite benchmark consisting of major local and international asset classes at a fixed and competitive investment management fee. Derivative contracts are primarily used to obtain exposure to the relevant asset class indices.

The fund is classified as moderately aggressive given that the exposure to local and offshore equities is 70%. The fund is therefore expected to exhibit a moderately higher level of volatility in the short to medium term.

The fund aims to provide the investor with investment returns equal to the performance of the composite benchmark less the fixed investment management fee. Actual performance may differ from this due to rebalancing effects.

## Fund information

Fund manager	Sanlam
Fund size	R11.3 billion
Launch date	February 2014
Fee class launch date	April 2019
Asset management fee	0.30% p.a.
Performance fee	No

## Benchmark

Asset class	Weighting	Benchmark
RSA Equity	42.5%	SWIX40
RSA Listed Property	5.0%	SAPY
RSA Fixed Interest	7.5%	GOVI
RSA Inflation-linked Bonds	5.0%	IGOV
RSA Cash	2.5%	STEFI Composite
Foreign Equity	27.5%	MSCI World Index
Foreign Property	5.0%	FTSE EPRA/NAREIT Developed
Foreign Alternatives	5.0%	FTSE Global Core Infrastructure Index

### Note on the benchmark:

The fund is rebalanced on a quarterly basis. With each rebalancing, the fund manager will endeavour to invest according to the specified benchmark allocations. Where it is not possible to rebalance precisely according to the specified benchmark allocations, the fund manager will aim to invest within a narrow range from the specified benchmark allocations. The cash component of the benchmark is flexible and is used as a balancing item on quarterly rebalancing. Cash can range from 0% to 7.5% of the portfolio.

## Mandatory disclosure

The information contained in this document does not constitute advice by Sanlam. Whilst every attempt has been made to ensure the accuracy of the information contained herein, Sanlam cannot be held responsible for any errors that may occur. Sanlam does not guarantee that the investment fund will produce returns equal to the specified benchmarks. The benchmark is only a mark against which the success or skill of the underlying fund manager is evaluated. Past performance cannot be relied on as an indicator of future performance. Investment performance will depend on the growth in the underlying instruments, whose value may move up or down because of various factors including the financial market environment and exchange rate movements. Your Sanlam plan performance will differ from the returns indicated in this document due to charges, fees, taxes as detailed in your plan contract. The overall impact of charges and fees in your plan is indicated by the Effective Annual Cost (EAC) measure, which is disclosed in your Sanlam product documentation.

## Investor profile

The investor's primary goal is capital growth. The investor is prepared to tolerate greater fluctuations in short-term returns in anticipation of higher returns over the long term. They also seek to diversify exposure to different asset classes on a passively managed basis.

## Risk category

The fund manager may utilise credit assets (financial instruments exposed to credit risk) instead of cash to fund the obligations in derivative contracts that have been entered into to gain exposure to other assets. Any profit or loss resulting from use of credit assets will be for the account of the fund manager.

## Effective asset allocation

## Cumulative long-term performance

Indicative value of R100 invested at inception, after fees.

For illustrative purposes only.

## Annualised returns

Indicative fund performance, after fees.

Returns are annualised for periods equal to or longer than one year.

## Total investment cost

Indicative total investment cost as at 31 March 2024.

Total expense ratio (TER)	0.30% p.a.
Transaction cost (TC)	0.00% p.a.
Total investment cost (TIC)*	0.30% p.a.

\* TIC = TER + TC

The asset management fee at benchmark is included in the TER.

The return of the fund is after the deduction of the TIC. It must therefore not be deducted again from published returns.

## Regulation 28

This fund is managed according to Regulation 28 of the Pension Funds Act. Regulation 28 limits the extent to which an approved retirement fund may be invested in particular kinds or categories of assets. The most important Regulation 28 asset class limits are as follows:

- Equity 75%
- Listed Property 25%
- Offshore Assets 45%\*
- Hedge funds 10%

\*As prescribed by the South African Reserve Bank.
